

# Article layout

## 1 Exercise briefing

Create an HTML page that looks like the provided UI article-page-layout.png.

Use the enclosed components images.

Fonts: Roboto and Poppins

The exercise can be developed by creating static HTML/CSS or by using a Front-end framework like react.js or Vue.JS

*Hint: fontawesome can be useful*

### Task1

- Create the page layout like in the image provided

### Task2

- Make the page responsive

### Task 3 (Bonus)

- Make the header sticky when scrolling the page

When done, publish the result to a public git repo (Github, Gitlab, etc)
